

**HMI DOP-100
SERIES**

Advanced Human Machine Interface for

The DOP-100 Series Human Machine Interfaces include a Basic HMI, Standard HMI and Advanced HMI for different applications. The HMIs adopt the latest Cortex-A8 / Dual Core high-speed processor and 65,536 color LCD screen with high brightness and contrast. In addition, they are equipped with the HMI programming software DOPSoft 4.0 and built-in Lua editor for easy programming as well as alarm / history log / user authority functions for highly efficient management.

With advanced communication capabilities and enhanced functions, the DOP-100 Series elevates machine efficiency to bring more value to our customers, and to achieve "Automation for a Changing World"!

Standard HMI

Features General and Ethernet Types for various applications

Future Industry

Advanced HMI

Features narrow frame design, supports various network communications, multilingual input and multimedia functions

Basic HMI

Simple operating structure for harsh environments

Advanced HMI

The Advanced HMI adopts a wide screen and narrow frame design. It supports Ethernet communication & multilingual inputs. The Multimedia Type DOP-112 / 115 offers multimedia functions to meet different applications.

Features

Narrow Frame

Enlarged visual display for better user experience

LUA Language

Simple and easy structural programming language to meet various demands

Pressing times >10,000,000

Effective pressing times increased through strict endurance tests

IP65 Rating

The front case protects the HMI from snow, rain, and dust

Multilingual Input

16 different languages input for easy operation

Diagnostics Function

Collects and solves issues remotely

Power Isolation

Protects the HMI from accidental surge interference

VNC Remote Monitoring

Remote control with mobile devices

QRcode Scanning

Generates QRcodes with self-defined content for mobile device identification

Supports GIF Graphic Elements

Easy setting to play vivid GIF elements

Embedded Linux System

Open system for flexible and stable program development

DOPSoft 4.0

New software DOPSoft 4.0 offers more complete functions and a better interface

Operating Temperature 0°C ~ 50°C

Compliant with industrial operating environments

CE / UL Certified

Compliant with CE and UL standards

Multimedia Functions

Captures image with an external camera or replays important recordings

Ethernet Communication

Connects to a master device or PLC with high-speed Ethernet communication

Communication Isolation

COM and Ethernet ports with built-in isolation circuits enhance communication stability

FTP/eMail Supported

Simple data transmission and real-time status report

Supports PDF and TXT Reader

PDF and TXT files supported

User-Friendly

Intuitive operation interfaces for users

Camera & Video Play

Multi-Media Functions

Analog Camera

Supports external camera via analog, suitable for capturing fast and short-distanced images

Applications: Textiles | Pharmaceutical | Rubber & Plastics

IP Camera

Supports IP Camera via Ethernet, suitable for capturing remote and wide-range images

Applications: Packaging | Logistics | Mining | Power Generation | Oil & Gas

VGA Input

Displays images from external devices such as machine vision systems, PCs or notebooks

Video Play

Views mpeg4 files captured by analog or IP camera from internal storage or USB disk/SD card

Event Trigger

HMI performs specific actions when an event condition occurs
Sets up event trigger conditions to capture images and archive as mpeg4 files

Multi-Language Input for Localization

- ▶ The Advanced HMI supports multilingual inputs for:
 - Recipe Name (ENRCPG)
 - Recipe Group Name (ENRCPNO)
 - Recipe Content (Char)
 - User Name
- ▶ Supports 16 languages: English, Traditional Chinese, Simplified Chinese, French, German, Russian, Japanese, Korean, Spanish, Portuguese, Hindi, Turkish, Arabic, Persian, Italian and Polish

Standard HMI

The Standard HMI is equipped with 2 COM ports to meet most applications. It also offers Ethernet Types for fast and easy connection with other equipment.

Features

Embedded Linux System

Open system for flexible and stable program development

LUA Language

Simple and easy structural programming language to meet various demands

DOPSoft 4.0

New software DOPSoft 4.0 offers more complete functions and a better interface

Robust Hardware

Power Isolation

- Complete series with built-in power isolation circuits provides the most complete protection against accidental external spikes

Fully Isolated Communication Interface

- Complete series has built-in COM and Ethernet isolation circuits to protect against noise that can occur from the grounding of various devices such as PLCs, servo drives, inverters and others

PCB Coating

- Complete series has PCB coating for enhanced durability and to protect against humidity and dust for applications in a range of environments

Programming Software – DOPSoft 4.0

Abundant Elements

- ▶ Abundant built-in element graphics for vivid interface display for a variety of industrial applications

Smooth Animation

- ▶ New smooth animation technology for realistic dashboard display

Programming Software - DOPSoft 4.0

User-friendly Programming Interface

The screenshot displays the DOPSoft 4.0 programming environment. The interface includes a menu bar (File, Edit, View, Element, Screen, Tools, Options, Window, Help), a toolbar, and a main workspace showing a 3D industrial scene with tanks and pipes. On the left, a 'Project' tree lists various elements like HMI, Screen, Communication, Tag, Alarm, Recipe, History Buffer, Multi-language, Account Settings, Configuration, Text Bank, Picture Bank, Camera Device, Event trigger, Sound, Program, and Main. Below this is an 'Output' window showing a list of messages and errors. At the bottom, a 'Screen Management' panel shows thumbnails for different screens (Screen_2, Screen_4, Screen_5). Green callout boxes with lines pointing to specific interface elements provide the following descriptions:

- Bookmark Management**: Bookmark menu allows users to switch pages easily
- Project Management Batch**: Quickly switch items via the project branch feature
- Editing Area**: Provides real-time display of your edit
- Output List**: Automatically displays edit results of each screen. Users can review and resolve errors by clicking screens
- Edit Preview**: Quickly browses the overall project via edit preview

User Authority Management

Account and Authorization Management

- ▶ Supports 8 levels of authority and allows 8 accounts (account name/password) for each level
- ▶ Different function and operation access for each authority level to enhance operation safety

Operation Log

- ▶ Operation log for different user accounts to trace/analyze possible causes of malfunctions
- ▶ Provides comprehensive information for managers to analyze the operating habits of different users and improve efficiency

Cloud Integration

Only With Ethernet

FTP Server

- Built-in FTP server to update recipes or PDF files, and backup historical data, operation log and alarms

VNC Server

- Built-in VNC server allows remote monitoring and operating of the DOP-100 Series via VNC Client APP (Windows, iOS, Android)
- Lock function: block remote operation during on-site operation to avoid unsynchronized commands. VNC server allows remote monitoring but not remote operation when the lock function is on

Web Monitoring

- Allows direct monitoring of register data via web page, and requires no additional software installation

1) The half-life of a backlight is defined as the original luminance being reduced by 50% when the maximum driving current is supplied to an HMI.6

2) Built-in power isolation

3) An isolated power supply is recommended.

4) Some models are in the process of application for UL and KCC certification. For more information, please consult our distributors.

5) The value of the power consumption indicates the electrical power consumed by the HMI with no peripheral devices connected.
